

Medium Speed Paper Bowl Machine

This Medium speed paper bowl machine are two forms of paper bowl coater: straight coat coater and hollow coater. Direct wrap coater: The coat layer is directly wrapped outside the white paper bowl, and there is no gap between the inner bowl and the coat. Hollow jacket machine: There is a gap between the jacket layer and the inner bowl, and the bottom of the jacket layer has a roll bottom, which is more anti-scalding than a straight bag. Coated paper bowls (double-layered paper bowls) are used for hot

food (instant noodles, etc.).

Model:YB-W35

Yongbo Machinery Medium speed paper bowl machine Introduction

This Yongbo Machinery **Medium speed paper bowl machine** is the new design adds a bottom heating system more than the old design which make the paper cup sealing effect is more better. This model is equipped with 10 Cup molds, which operates faster than the old 8 Cup molds. The steel plate presses the bottom paper to make the paper feeding more stably and smoothly. Two cooling fans, two fans can make the paper fan cooling faster, make the cup fan better sealing

Yongbo Machinery Medium speed paper bowl machine Parameter (Specification)

Model	YB-W35 Automatic Paper Bowl Forming Machine
Cup Size	20-50oz(Mould Can Be Changed As The Requirements Of Clients)
Raw Materials	Single /Double PE Coated Paper
Paper Weight	140-350gsm
Speed	60-75pcs/Min
Power Source	380V 50Hz
Total Power	4.8KW
Weight	2400KG
Dimension L*W*H	2450 X 1300 X 1750mm;
Air Pressure Requirements	0.6Mpa, Output :0.6 M3/Minute

Machine Should Work With The Air Compressor

Yongbo Machinery Medium speed paper bowl machine Feature And Application

This **Medium speed paper bowl machine** Reliability:

YB-W35 intelligent medium-speed paper bowl forming machine has the advantages of high performance, high efficiency and high quality;

The integral steel body and the auto oil lubrication system ensure long-term normal and stable operation of the machine

This **Medium speed paper bowl machine** Energy efficient:

The advanced high-precision open cam drive and gear drive make it more accurate and stable; Servo tracking bottom paper feeding locks the size of the bottom paper, which effectively saves raw materials;

1. Photoelectric failure-detecting system is available. PLC control system for the whole cup forming process. E.Servo control to send bottom paper of cup, deliver bottom when cup tube come, otherwise no bottom delivery. F.Stretch knife uses for bottom cutting. Easy changed and more stable.
2. Switzerland Leister heating device is equipped for cup body and bottom sealing, bottom are heated at first before they are feeding, thus improving heating effect and helping guarantee knurling.
3. Paper Soup Bowl Making Machine knurling device adopts hardening treatment,make up the cup knurling more beautiful and increase it use life.

Yongbo Machinery **Medium speed paper bowl machine** After-sale service:

Ruian Yongbo Machinery Co., Ltd
Tel: [+86-577-65655975](tel:+86-577-65655975)
E-mail: sales1@yongbomachinery.com

Phone: [+86-18057720590](tel:+86-18057720590)

After the equipment leaves the factory, the company sends professional technicians to install and debug the equipment to produce qualified products that customers are satisfied with. One year free warranty and lifetime technical support.

Yongbo Machinery **Medium speed paper bowl machine** Later service:

The company has set up professional and technical personnel to tour all over the country, visit customers regularly, and discuss with customers to solve new problems in use in a timely manner. And cooperate with customers to formulate sales plans. It is our diligent pursuit to let customers buy with confidence and use them comfortably.
